Hengyang Runtai Fire Chemical Co., LTD

Technical Specification for

Fire Extinguisher Ball FAFB

Model	Diameter	Weight	Stop fire area	React time	Packing (mm)					Weight (kg)		
					Qty/ctn	L	W	H	CBM	N.W.	G.W.	G.W/CTN
RT-013	150mm	1.3kg	3.0 m³	≤ 3 s	12pc	56	38	38.5	0.082	1.3	1.7	20.5

Certification: CE, ROHS, SGS, and runtai fire has passed the ISO / TUV certification audit

Features:

1. Fast Auto Fire Ball is a kind of newly invented light-weighted extinguisher.
2. When simply thrown into the fire, it would activate within 3 seconds and effectively disperse extinguishing chemicals.
3. When fire occurs and no one is present, it would self-activate when it meets with fire and gives loud noise acting as fire alarm to warn the people nearby.
4. There is no special training or skills required to operate the ball and no need to face any dangers. No inspection and maintenance are required for the product life span for 5 years.
5. It can be placed in many fire prone areas, such as electrical circuit breakers, kitchen, cars, hotels, home and office...
